Customer Service Week Lost Patient Challenge

Medical facilities can be confusing and frightening places. So when you have the chance, don't let patients get lost. Escort them to their destination.

Your objective in this challenge is to move the lost patient to Room 1044. You may move one square at a time, but you may only move to a new square that has a number greater than the square you are on. You may also move if the square is half the number of the square you are on. You may not move diagonally.
